

R.W. LYALL

LYCOSAVER BY-PASS VALVES

Customer Benefits

- LYCOSAVER allows for the uninterrupted service of gas during change-out or repair of the meter or regulator.
- Improved safety and usage over conventional methods of purging air from the bypass line.
- Eliminates the need for cumbersome rubber bags during gas meter change-outs.
- LYCOSAVER delivers the highest flow capacity with the least amount of pressure drop over other types of devices.
- Eliminates inconvenient and costly customer relight calls.

Advanced Features

- Unique design allows for either vertical or horizontal installations.
- Durable steel pipe construction, coated with electrostatically applied polyester or zinc plating for corrosion protection.
- Precision ANSI specified Malleable fittings and medium Density PE internal parts.
- Meets all applicable design requirements specified in the Code of Federal Regulations, ANSI, DOT and certified to meet ASTM requirements.
- No internal moving parts during continuous service to wear out.
