

# IT CAN'T GET ANY EASIER

## POOL/SPA GAS PIPING PRODUCTS

At Lyall, we apply our 30 years of piping systems experience to make your pool and spa heater installations easier than ever. All Lyall products—like our pre-bent risers—are designed for easy installation, saving you time and lowering your cost of installation. Innovative Lyall designs along with the most durable materials in the industry, such as corrosion resistant factory coatings, mean long-lasting products that perform to keep systems up and running.

# NOW, POOL/SPA HEATER INSTALLATIONS ARE EASIER THAN EVER.

## EXPERIENCE A BETTER CONNECTION

When it comes to getting the job done right the first time, and as quickly as possible, there's no better solution than Lyall products. Our innovative designs create better products—products that can solve everyday problems, provide more safety, and even last longer.

**Corrosion Resistant Coatings** - With Lyall's own superior processes for applying corrosion resistant coatings on all exposed steel surfaces, you'll be providing not only longer lasting installations but a better above-ground visual appearance as well.

**Easy Installation** - The LycoFit® patented connection system, which requires no pipe preparation or special training, is easier and faster to install than other mechanical fitting and thermal-fusion methods.

**Sized for All Needs** - Lyall manufactures Copper Tube Sizes (CTS) and Iron Pipe Sizes (IPS) to meet all your installation needs, including the sizes required for the most common residential and commercial pool and spa natural gas and propane heaters, grills, lighting, and other permanent appliance installations.

**Recognized Quality** - For your customers' safety, all Lyall products are 100% factory tested, and meet or exceed all ASTM, DOT, ANSI, ASME specifications, as well as being listed under NFPA, IAPMO/UPC, and CSA.

## BACKED BY 30 YEARS OF EXPERIENCE

We apply our 30 years of experience and knowledge to the development and manufacturing of quality products to suit all of your gas piping installation needs. All Lyall products are designed for easy installation, time savings, and lower cost of installation.

Commercial/Industrial Natural Gas Piping Systems

Liquid Propane Residential and Commercial Piping Systems

Pool/Spa Gas Heater Piping Systems

## THE PRODUCTS YOU NEED

Lyall offers a comprehensive selection of risers, fittings, sizes, and styles, including reducer fittings, 3-way tees, 90° elbows, PE to copper transitions, and Polyethylene (PE) to steel transitions. So, whether the project is natural gas or propane, large or small, we've got you covered.

**Lyall Risers** - Lyall Gas Risers offer a safe and dependable transition from below-ground PE gas pipe to above-ground gas appliances. The internal Lyall PE to Steel Transition Fitting, with its patented, steel barbed spigot, provides a permanent gas seal while the electrostatically applied epoxy coating on the steel casing provides the best protection against exterior corrosion. Common Sizes: 1/2", 3/4", 1", 1-1/4", 1-1/2", and 2" IPS. Smaller sizes also available for gas grills, gas lights/torches, fire pits, and other yard features.

**LYCOFIT® Mechanical Fittings** - LYCOFIT® Mechanical Fittings are an effective and economical solution to below-ground, PE gas pipe connections that are gas tight and stronger than the pipe to which they are connected.

Our patented design uses a barbed spigot to seal the inside diameter of the PE gas pipe. Regardless of the outside condition of the pipe, this assures a positive seal between the fitting and pipe by using the polyethylene as the "gasket" material. This eliminates the need for thermal-fusion as well as O-rings or rubber gaskets that could leak or deteriorate under adverse conditions. It also provides the gripping power to resist pull-out 100% of the time.
